

THE
Weaver's Almanack:

AN
EPHEMERIS

For the Year 1688. and from the
Creation, according to Sacred Writ, 5637.

Being the Bissextile or Leap-year.

Wherein are contained on the left hand Page six
Columns: 1. The Month-days; 2. the Week-
days; 3. the Saints days; 4. the Moon's place;
5. the Weather; 6. Lunar Aspects.

On the right hand Page are contained eight Columns; the
two first are for Month-days and Week-days, the Planets
standing each for the day they govern: as, *Luna* for Mon-
day; 3. Planets places, degrees and minutes; 4. the Sun's
place; 5. the Sun's rising; 6. the Sun's setting; 7. mutual
Aspects; 8. the Moon's rising and setting, and at the end of
the Months is added by the Author two necessary Tables,
one for right Ascension, and the other for oblique Ascension.

By Thomasius Strut, Student in Astrology.

*I will behold the Heavens, even the Works of thine Hands,
the Moon and the Stars which thou hast ordained, Psalm*
8. 3.

London, Printed by R. Holt for the
of Stationers, 1688.

EPHEMERIS

For the Year 1688. and from the
Creation, according to Sacred Writ, 5637.

Being the Bissextile or Leap-year.

Wherein are contained on the left hand Page six
Columns: 1. The Month-days; 2. the Week-
days; 3. the Saints days; 4. the Moon's place;
5. the Weather; 6. Lunar Aspects.

On the right hand Page are contained eight Columns; the
two first are for Month-days and Week-days, the Planets
standing each for the day they govern: as, *Luna* for Mon-
day; 3. Planets places, degrees and minutes; 4. the Sun's
place; 5. the Sun's rising; 6. the Sun's setting; 7. mutual
Aspects; 8. the Moon's rising and setting, and at the end of
the Months is added by the Author two necessary Tables,
one for right Ascension, and the other for oblique Ascension.

By Thomasius Strut, Student in Astrology.

*I will behold the Heavens, even the Works of thine Hands,
the Moon and the Stars which thou hast ordained, Psalm
8. 3.*

London, Printed by R. Holt for the Company
of Stationers, 1688.

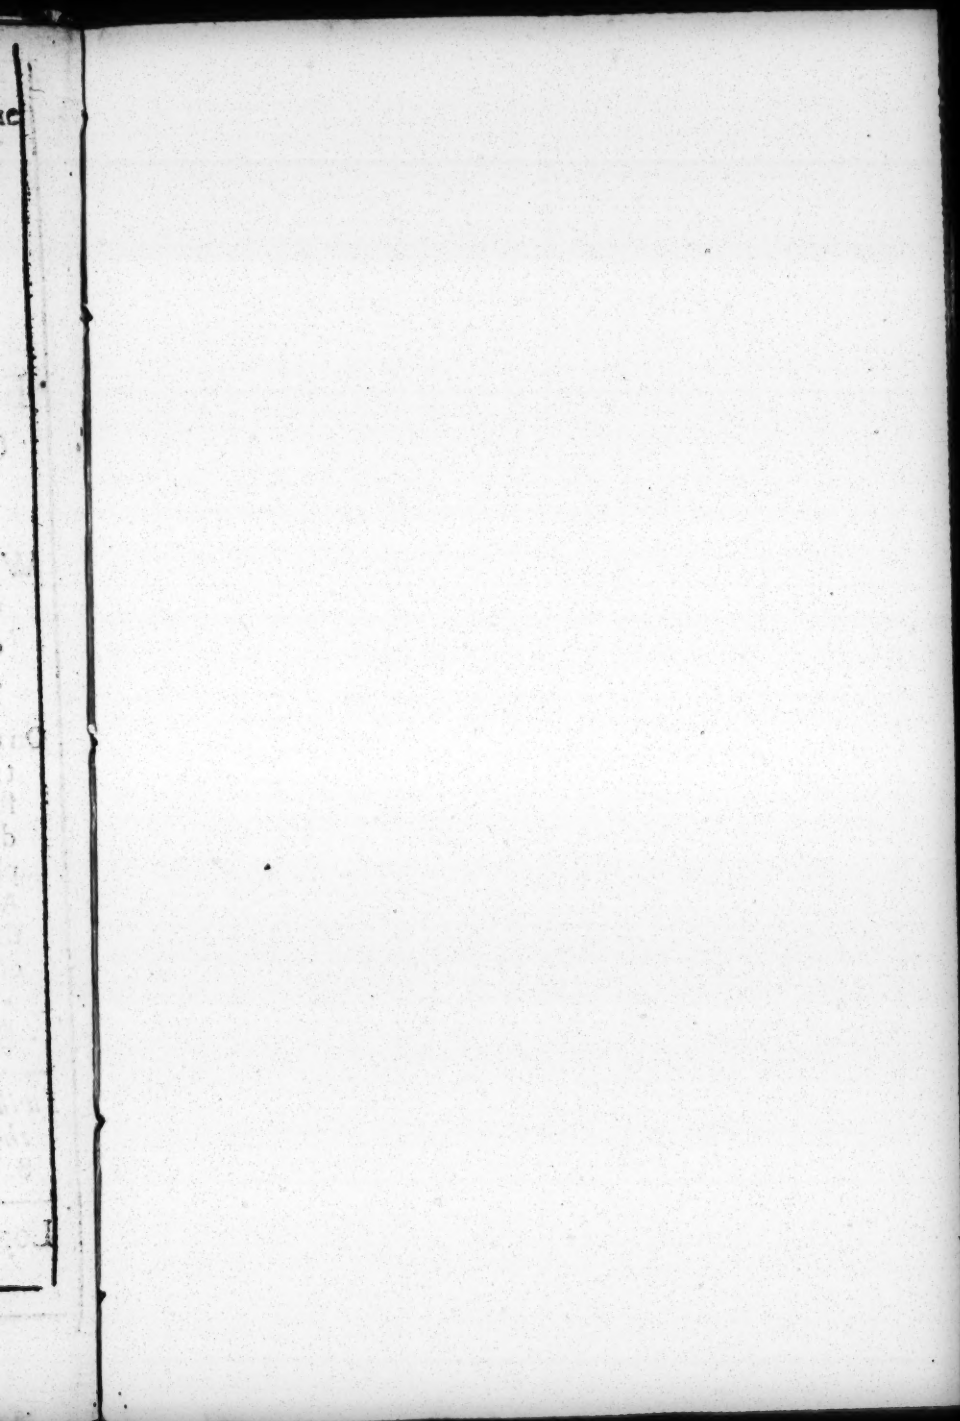

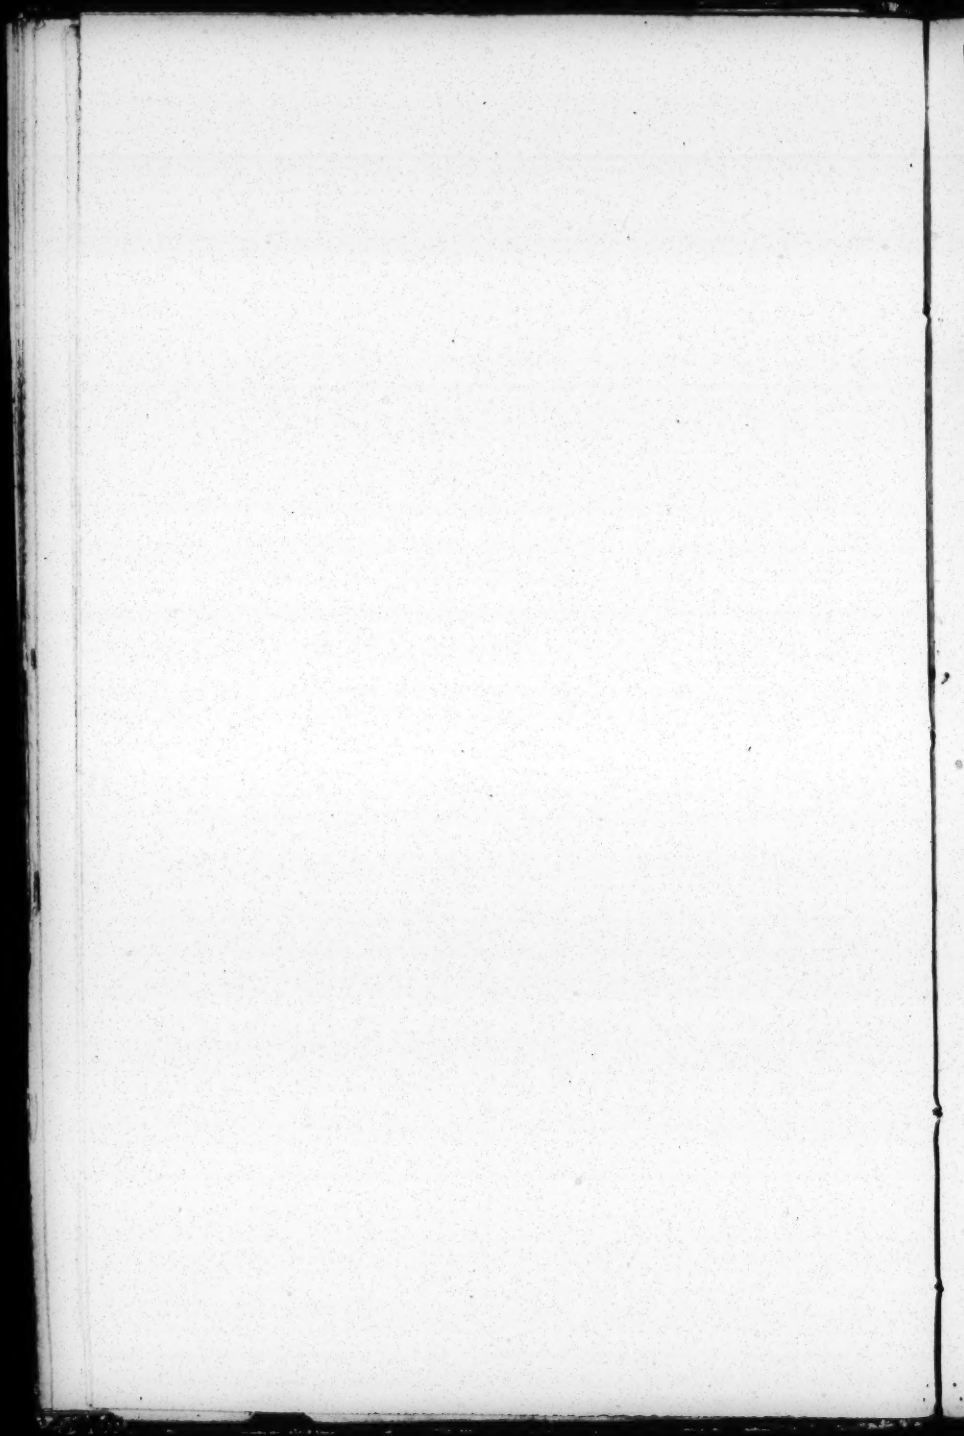

A Figure of Anatomy, shewing what part of the Body the
 Moon governs, by being in any of the Twelve Signs.

Upon the Twelve Signs.

- ♈ Aries Head and Face doth claim,
- ♉ Bull Taurus at the Throat doth aim,
- ♊ The Arms are ruled by Gemini,
- ♋ Cancer the Stomack doth supply,
- ♌ Leo doth rule the Back and Heart,
- ♍ The Belly is fair Virgo's part,
- ♎ The Reins and Loins are Libra's share,
- ♏ whilst Scorpio keeps the Secret ware,
- ♐ Sagittarius owns the Thighs,
- ♑ Swift Capricorn the Knees supplies,
- ♒ Aquarius Legs and Shanks doth own,
- ♓ Pisces must have the Feet or none.

A Table shewing the distance of all the chief Towns in England and Wales, each from other, with their Situation from London.

A Table for the Southing of the Moon, and high Water at London-Bridge.

At Change or Full		South		High Water	
		hours	min.	hours	min.
		0	0	3	0
Days after	1	0	49	3	45
	2	1	38	4	23
	3	2	26	4	54
	4	3	15	5	24
	5	4	4	5	55
	6	4	53	6	30
	7	5	41	7	12
At the Quarters		6	0	7	30
Days after	1	6	49	8	23
	2	7	38	9	23
	3	8	26	10	28
	4	9	15	10	36
	5	10	4	0	43
	6	10	53	1	45
	7	11	41	2	40

This Table serves for ready use with any Almanack for ever, and is much more exact than the Vulgar Tables accommodated to the Moon's Age, the High Water being here adjusted to the Moon's Southing.

1688. January hath xxxi. Days.

1 at peel -

2 went to Knutsford wth sr J. Crew N. Lee
to Dinner to G. Legh - met my father
etc: sr L. Parsons & his family: sr R. Stanley
& J. Bradshaw & Jo: Harrigon: Inth sr J.
Crew & N. Lee went to prove -

3 at prove

A Ditto -

5 sr J. Crew N. Lee ^{wd} went to Dinner to Mr
Cockayne - met Atkinton family: sr M. B.
Dick mynshull Jackson, & Jonathan
who went to peel y^t night wth me -

6 at peel y^e same company stayed

7 the Chester friends went home ~~we~~ brought
Dick mynshull to Tarvin -

8 went to Church to Tarvin went wth M. E. Jones
& his Bro: perrot to y^e Greyhound called
at J. Trovner's as I came home -

9 Dined at Atkinton Mr Cockayne & Mr
Sherrards family, & Major Dand's Daughter

10 went to y^e Quarter Sessions at Northwich
stayed all night y^e sheriffe sr T. Groves
sr Rowland Stanley sr J. Aldern & J. Oldfield
T. Chomley Dod of Bixton were all the
justices - N. Booth N. Lee Rob: Lee & Tom
Chomley Holford there - etc.

11 Dined at Northwich - N. Booth sr J.
Garrison sr R. Stanley & y^e Lees gone
John of H. offord there came home
met G. Legh on y^e forrest -

- 12: at home
- 13 met M^r. Braen hunting. he his
bro: Jonathan his Bro: Perrott
& Humphrys a Barber came home
wth me —
- 14 S^r. Mich: Biddulph went to Chester
died at 9: Mainwaring's met y^e
usual gang at y^e. Sam lay at
Jacksons —
- 15 came home to dinner Dick Mynshall
came at night & Traverser —
- 16 at home Jackson dined here —
- 17 met M^r. Braen in y^e. St. Mark's hunt
dined at M^r. Hardware —
M^r. Braen & his went to Kent
- 18 at home in y^e. Evenig at Bromlys
- 19 Abner Anderson M^r. Barrack
M^r. Mercer Humphrys Barber dined here
- 20 dined at Jacksons y^e. Legh W^m. Clegg
& Dick Mynshall T. Swarbrick D. P. Pa-
nington & Charley Hurleston came
to us I went home wth Charley y^e
Governor was there, went home
that night
- 21 met y^e. Legh & young popnington
at Thorbin wth S^r. Mi^l. B;
- 22 at Church met Co: Braen.
- 23 at home met M^r. Hall of Morley
at Kent — y^e. Legh came hither.

Months.
Weeks.
Days.

You may now set all kind of Fruit-trees, and Plants, as Pears, Plumbs, Filbirds, and Walnuts. Set Beans, and Pease after the full Moon. Sow Seeds that root downwards, as Carrots, Parsnips, Onions, Parsley, Spinage. Those things that you would have grow or bear quickly, plant, sow, or cut at the Increase of the Moon.

Longitude of the Planets from the first Point of ♈.

♈ 12193 | ♉ 17465 | ♊ 2955 | ♋ 18534 | ♌ 21245

In the new of the Moon, the wind being any but West or South, graft Pears, Wardens or Apple-trees. Let blood according to strength and necessity, the sign and weather also being fit, but take advice of the learned Physician. Sow or set Cabbages.

Merrill

In the moon looking and feeling at the full moon
you have to keep dry for the whole year, wood you
corn fields and gardens for four years and stillness
now farmers that sleep the Moon's shadow for ten
then Wool will grow again the old

[illegible]

Longitude of the Planets from the first Point of T.

♂ 11866 | ♀ 17710 | ♂ 6503 | ♀ 15307 | ♀ 4157

Month days.
Week days.

In this month inoculate, and gather at the full Moon your Herbs to keep dry for the whole year, weed your Corn-fields and Gardens, set Rosemary and Gilliflowers, sow Lettuce, shear Sheep the Moon encreasing, for then their Wooll will grow again the faster.

Month-days *Week-days* You may still sow Sallet-Herbs, gather Flowers and Seeds to keep; walk not in the Evening before the Sun be set, chiefly in any sickly time, as when the Plague or Pestilence is raging; keep the Windows of your Chamber shut close, and open them only when the Sun shines.

Month-days.

Those that would have large quantities of Seed, and those good for their Gardens next Year, must gather them of their own, lest in buying they be cheated, and so come to lose their Expectation, and Money too: you may now sow Lettuce or other Herbs in the new of the Moon.

Month & days.
Week days.

Now you may make Conserve of Barberrie, Guinces, Mar-
malade, and other pretty rarities, in which the most considerable
one of the Nobility and Gentry of the Female Sex are wont to
employ themselves, for the furnishing their Closets: The sober
Farmer begins to glory in the goodness of his new Crop, and
breathing it out apace.

Longitude of the Planets from the first Point of ♀.

♂ 12373 | ♀ 17289 | ☿ 11167 | ♀ 12541 | ♀ 1051

Make Malt, kill Flies, trench Garden with Dung, terrall
 sorts of Roots; first in Pots, but afterward remove them;
 remove Roses, and Berry Bushes, gather Apples this full Moon
 to keep, you may set either Beans or Pease, remove young
 Trees, cut your Rose-trees but once in two years, if you would
 have store of Roses.

The *WEAVERS* ALMANACK,

The Second Part.

For the Year of our Lord God,
1 6 8 8.

Being the Bissextile or Leap-Year.

Wherein is contained

The ECLIPSES, an account of the Four
Quarters of the Year, and also some
Astrological Observations on the
TWELVE HOUSES.

By ——— *Strut*, Student in Astrology.

L O N D O N:
Printed for the Company of Stationers.
1 6 8 8.

Of the Four Quarters of the Year.

And first of Winter.

*Now tender Plants are pierc'd, as dead they look;
The mournful Birds have all their mirth forsook;
The Days are short, Nights long and cold, I wot;
And all by reason Sol's to th' Tropick got,
Of Capricorn, &c.*

TH E Winter-Quarter began at such time as the Sun entered the first Scruple of Capricorn, and that was December the 11th 1687. about 3 min. past two of the Clock in the Afternoon. And then doth the first degree of Gemini ascend in the East, and 29 degrees of Capricorn is upon the Mid-Heaven, the beginning of Sagittary on the Cusp of the seventh House, and the end of Cancer is the *Funum Caeli*, or the Cusp of the fourth House. The Maleficks are the strongest in this Figure; Jupiter is in the fourth degree of Capricorn, where he hath his fall, and is placed with the Sun in the eighth House. Saturn is strong in the sixth; 'tis no good Position. Other things might be observed, but we must be modest; 'tis good to keep within our own Sphere. I shall only advise to consult the able Physician in time, for there is seemingly a sickly Season approaching: The Diseases most feared, this Quarter, are Quartane Agues, Black Jaundise, Consumptions, Scurvy, Drop sic, Rheums, Strangury, Quinzey, Cholick, Stone, &c.

Winter is only the departure of the Sun from these Northern parts of the Earth, by which the Inhabitants are deprived of much of the heat thereof. The Diurnal Ark of the Sun being then small, and the Nocturnal Ark great, and the Beams of the Sun being then darred so ob-

liquely upon us, thereby doth Cold, the great Evening of Nature, prevail: And it is also necessary that the Earth should once a year be compressed with Cold, for thereby its intrinsick heat is actuated, and so made more fit for a ready production, whenas the enlivening Rays of the Sun shall open its external Pores, and thereby animate the Nursery of Nature, as hath been by many well observed.

*Winter consumes the Fruits laid up in store;
Spring promiseth, and Summer bringeth more.*

Of the Spring-Quarter.

*In Spring each Month doth new Delights afford,
And merry Birds do likewise then accord,
To add delights by their most pleasant Note;
Yea, Philomel doth warble through her throat
Her fatal story, yet with pleasant voice.
Thus Sol's approach doth all things here rejoyce, &c.*

Spring-Quarter beginneth when the Sun enters the first Scruple of Aries, which is this Year *March* the 9th, about 46 min. past three in the Afternoon: Then doth 6 degrees 28 min. of *Virgo* ascend in the East, and 29 of *Taurus* doth culminate, 6 deg. 28 min. of *Pisces* on the Cusp of the Seventh, and the end of *Scorpio* on the Cusp of the Fourth House; *Saturn* in his exaltation in the Second House; and Retrograde, casting an envious *Quartile* to *Jupiter* in the Fifth, doth signifie that Charity with many will be very cold; and that many close-fisted and covetous Misers, will take all possible care, that the Poor and Indigent (although their Friends and Relations) shall not be the better for their abounding. *Venus* is in the Sixth in *Tine*, and in reception with *Saturn* by house. The Sun and *Mercury* are in the Eighth House.

S T R U T. 1688.

I wish that this Quarter prove more healthful than the last; 'tis feared some more than ordinary complaints of Gouts, Cramps, &c. More might be noted, but at present let this suffice.

The Spring is so called, because then all kind of Vegetables do bud and sprout forth; and this their growth is caused by the Fermentation in the Earth, agitated and acted by the warmer Rays of the Sun: for from these principles proceed all things. Heat and Motion being the cause of all procreation, hence it follows, that where there is Heat, there must be Motion, and it is Cold alone that hinders it. Therefore it happeneth under the Equinox, that the Inhabitants have two Springs and Summers yearly, caused by the Suns passing to and fro: for the Sun coming to *Aries*, they have Summer; to *Cancer*, they have Winter; but coming to *Libra*, they have a second Summer; to *Capricorn*, a second Winter, &c.

*Spring unto us doth promise, what remaineth then?
That Summer perfect may, let's pray, and say Amen.*

Of the Summer-Quarter.

*Sol now arrived is to th' highest part
Of the Ecliptick, and from thence doth dart
His fiery Rays, which do to Ripeness bring
That which his milder warmth stir'd up i'th' Spring:
Nights now are short, but Days are long and hot,
By reason Sol so near the North is got, &c.*

THE Summer-Quarter begins when the Sun enters the first Scruple of the Tropical Signe *Cancer*, and that is *June* the 10th, about 7 min. after five of the Clock in the Afternoon: Then doth 23 deg. 44 min. of *Scorpio* ascend in the East; and the 16th deg. of *Virgo* doth culminate; 23 deg. 44 min. of *Taurus* is upon the Cusp of

the Seventh House; and the 16th deg. of *Pisces* is the *Junum Cæli*; *Mars*, Lord of the Ascendant, is in the Eighth House, in Opposition with *Jupiter* in the Second; the *Sun* and *Mercury* also in Conjunction in the Eighth House, and the *Moon* in the Fourth, in *Quartile* to them both. These give cause to fear some more than ordinary mortality: So many Planets in the Angle of Death, portends the death of several sorts of People. God preserve us from Diseases of a Pestilential nature ——— *Jupiter* in his fall, and being Retrograde in the Second, and opposed by *Mars*, doth signifie that many will find greater difficulty than they expected, in obtaining Wealth and Riches; and amongst the open-hearted and generous Spirits, more than ordinary Scarcity and wants of Money, through their over-free and liberal Expences. Much more might here be observed unto you; but I must not exceed, lest thereby I should give offence, &c.

The Summer, *quasi summa veris*, is that Season of the year, wherein all Vegetables do attain their highest degree of perfection, strength, and beauty; which is the effect of the Juices fermented in the Earth, and in the Roots, Bodies, and Branches of all Trees, Seeds, and Herbs; being brought to their perfection by the vigorous heat and power of the Sun, and by the same Sun will be parched and wasted, if not taken in their season, and so hid from his scorching Beams.

What Summer hath to Spare,

Let us preserve with heed;

Thus may we gain with care,

Supply for Winters need.

Of the Autumnal-Quarter, called the Fall.

Sol being return'd to th' Equinoctial Line,
Doth in great hast toward the South decline,
To our Anteci, and Antipodes ;
And t' all the Southern parts, as well as these,
He now doth lend his warmer Rays, to bring
Forward to them their so-long-lookt-for Spring.

To us Winter draws near ;

Thus do I run through all

Spring, following Winter,

Then Summer, and the Fall.

Fecunda vicissitudo Rerum.

THE Autumnal-Quarter begins at the Suns entrance into the Equinoctial Signe *Libra*, and that is, this year 1688. September the 12th, 36 min. past six of the Clock in the Morning : Then doth 6 deg. 20 min. of *Libra* ascend in the East ; and 8 deg. of *Cancer* is upon the Cusp of the Tenth House, or the *Medium Cali* ; 6 deg. 20 min. of *Aries* descending in the West ; and the 8th degree of *Capricorn* is upon the Cusp of the Fourth House : Here we have *Saturn* strong in the Ascendant, and *Venus* also virtually there, being strong, and Lady of the Eighth House, gives hopes that this may prove a more healthful Season than any of the former, If we be not already with them too much tainted. We seem to be in a peaceable, stayed, and settled condition, pray God continue it. *Jupiter* in the Fourth House weak, makes the Husbandman fear he shall bestow a great deal of Pains for a light Harvest. But the worst that I see in this Figure, is a Crowd in the Twelfth House ; yet I must be silent : God grant I may have liberty, and not take too much : 'Tis good sleeping in a whole Skin. Some know not when they are well : 'tis pity.

STRUT. 1688.

Autumnus, pro Autummus, ab Augeo, Autum, is so called, ab Augendis frugibus, vel quod tunc maxime Augeantur hominum opes. This is the Season wherein the Fruits of the Earth, both the Harvest and Vintage, are (by its cooling and drying nature, and being before grown to perfection) gathered and made fit to be preserved for future use.

*What Spring puts forth, and Summer maketh good,
In Autumn's gathered for our Winters Food.*

Of the Eclipses which will happen this Year 1688.

Four times will the Luminaries be Eclipsed to us that inhabit this Globe of Earth; twice the Sun, and as often the Moon; and they happen in the order following.

The first-Eclipse will be of the Moon, the 5th-day of April, about a quarter of an hour after six of the Clock at night: It happens in the 27th degree of *Libra*, and will be about eight Digits eclipsed; but the Moon not rising till near seven of the Clock, there will only the latter part thereof be seen in *England*. The Moon will rise about half eclipsed, as to us, and will be about an hour after ere it be fully ended, that is, about eight at night. This Eclipse will more plainly appear to all the more North and Eastern parts of *Europe*, the West parts of *Asia*, &c.

The second Eclipse will be of the Sun, upon the 20th day of April, betwixt one and two of the Clock in the morning: It happens in 11 degrees of *Taurus*, and will be invisible unto us; but will appear great to our *Periæci*, that is, to such as live under the same North Latitude, viz.

in the same Parallel, but in the opposite part to us, having their Noon, when we have our Midnight; to them it will appear very great, and near their Meridian: Also in *Japan, California, and in the Tartarian Ocean.*

The third Eclipse will be of the Moon, on the 29th day of *September*, betwixt ten and eleven in the morning, and therefore invisible unto us; but may be seen by our Antipodes. It happens in 17 deg. of *Aries*.

The fourth Eclipse will be of the Sun, upon the 14th day of *October*, between seven and eight of the Clock in the Morning. 'Tis celebrated in two degrees of *Scorpio*, but not any part of it visible unto us; for though the Sun be then newly risen, yet the Parallax of the Moon, (which is an Angle at the Moon subtended by the Semi-diameter of the Earth) together with her Latitude, is greater than the apparent Semi-diameters of the Sun and Moon. Hence we conclude that in respect of us, the Moon is so far depressed that we shall then see no Eclipse, yet will it at the same time appear very great to our *Antarcti*, and toward the *Antarctick Circle*.

Ptolomy in the 96th Aphorism of his *Centiloquium*, tells us, that the significations of an Eclipse shall be most visible, when the Eclipse is near an Angle.

Our first and only visible Eclipse happens very near the Ascendant; and *Proclus* tells us, that an Eclipse of either Luminary, happening in *Geminy, Libra, or Aquarius*, portends *Famine, great Sickness, pestilent Diseases, and the like*: He says also, that an Eclipse of the Moon in *Libra, Ultimo decano, magni clarique viri, interitum minatur*. But such things are signified to the Countries subject to *Libra*, which are — *Jamaica, Austria, Alsatia, Livonia, Subandria, Delphinat, Thuscia, Bactriana, Caspia, Thebais, Troloiticam*. — Cities and Towns, *Lisbon, Arles, Capeta, Landa, Placentina, Argentina, Spires, Frank-ford upon Mene, Hull in Suevia, Heilbrunne, Frisinga, Mosbachium, Landeshure, Vienna in Austria, Antwerp*.

The second Eclipse being invisible, and you having an account last year of the places subject to the Signe wherein it happens, I need say nothing farther of it. The

The third being also invisible, signifieth little unto us. I will only therefore give you the places which are subject to the Signe wherein it happens.

Under Aries are England, Germany, France, Suevia, Silesia the higher, Denmark, Polonia the less, Syria, Palestina, ——— of Cities and Towns, Stetin, Naples, Florence, Verona, Lindama, Aucona, Capua, Ferrara, Craconia, Padua, Brunswick.

The fourth Eclipse happens in Scorpio, and the places subject thereto you had last year.

An Eclipse of the Sun in Cancer, Scorpio, or Pisces, saith *Messahalab*, presageeth abundance of Rain, and much hurt thereby. *Proclus* saith, it doth portend Death of the Common People; also of Fishes, Water-Fowl, and other Creatures living in the Sea, &c.

Eclipses maxime agunt in illas Regiones, quæ sunt sub signo Ecliptico, vel illi sunt familiares: tum in homines quorum Nativitates constiterunt cum themate Eclipsas: & denique in illa loca, quibus Eclipses verticales sunt, vel præcipui significatores per verticem tempore Eclipsis præcedunt.

Quot horas durat Eclipsis Solaris, tot annorum duraturos effectus prænunciat: Quot horas durat Lunaris, tot mensum.

Of the Signification of the Twelve Houses.

HAVING furnished you with a Table of Houses, the Places of the Planets for every Day in the Year, and also with a Table of the Dignities of the Planets, I shall here, for the benefit of young Learners, give you the Signification of the Twelve Houses; whereby may be known what House is chiefly to be observed in each particular Inquiry.

Of the First House.

THE Ascendant, or first House, hath signification of the Life of Man, the Stature, Complexion, and Shape of the Querent or Native. In Eclipses and Mundane Revolutions, it signifieth the Common People in general, and the State of the whole Kingdom: and in a Nativity, if *Mars* be here, it infallibly gives a round in the Face; if *Saturn* be here, he gives always some great Deformity. In Horary Questions, from this House, we give Judgment of things belonging to the Querent's Life.

It is called the East Angle; and by the *Greeks*, *Deformos*: it governs in Man the Head and Face; its Confignificators are *Aries* and *Saturn*, this being the first of Houses; *Saturn* the first of Planets, and *Aries* the first of Signs; *Mercury* joyeth in this House; and of Colours the White is attributed unto it.

The signification of the Second House.

THis House gives Judgment of the Querent's Wealth, Poverty, moveable Goods, Money lent, Profit, Gain, Loss, or Damage in Law Suits, Quarrels, and Contentions: It signifies also the Querent's Friends and Assistants. In Eclipses and Mundane Revolutions, it signifies the Ammunition, Allies, and Support of the Kingdom; and also its Magazine.

It is called by the *Greeks*, *ανατολὴ*; it doth govern in Man the Neck; and of Colours it hath the Green.

Its Confignificators are *Jupiter* and *Taurus*; *Jupiter* in this House, strong in a Nativity, doth make a man rich and fortunate; but *Mars*, *Peregrine*, or the *Dragons Tail* here, makes him a Beggar.

Of things belonging to the Third House.

THis House gives Judgment of the Brethren, Sisters, Kindred in general, Neighbours, small and inland Journeys, removing from place to place; Rumours of News, Epistles, Letters, Messengers.

It is a Cadent Masculine House, and is called by the Greeks, *Θέα*; and rules in Man the Shoulders, Arms, and Hands.

Its Consignificators are *Gemini* and *Mars*; and of Colours, the Red and Yellow are attributed to it.

Of things signified by the Fourth House.

THis affords Judgment of Fathers in general; and in particular, of the Querents or Natives Father; of Lands, Houses, Inheritances, Tillage, hidden Treasure, the end or determination of any thing: also of Castles, Cities, and Towns besieged, or not besieged: and the Lord of this House doth personate the Governour of the places aforesaid.

It is the North Angle, and is called by the Greeks, *ὑπερθεον*; and by the Latines, *Junum Caeli*: It rules in Man the Breast and Lungs, and is Feminine.

Its Consignificators are *Cancer* and *Sol*; and of Colours, the Red.

Of Matters belonging to the Fifth House.

From hence we give Judgment of the Condition of Women with Child, the Sex of the Infant, of Children in general, Banquets, Taverns, and Merriment; of Embassadors, Agents, the Wealth of the Father, the Ammunition

munition of a Town besieged, &c. and is called the House of Pleasure and Delight.

It is a Masculine Succedant, and rules in Man the Heart and Back. It is called by the *Greeks*, ἀγαθή τύχη; and by the *Latines*, *Bona Fortuna*.

Its Consignificators are *Leo* and *Venus*; and of Colours, it rules Black and White.

Of things signified by the Sixth House.

THE Judgment belonging to this House, doth take notice of Sicknefs and Diseases, its nature and quality, curable or not curable: also of all Servants, of what quality soever: all kind of Cattel, as Sheep, Goat, Coney, &c: also of Uncles and Aunts, or the Fathers Brothers and Sisters: of Shepherds, Hogherds, Warreners, &c.

It is a Feminine Cadent House, unfortunate, as having no Aspect to the Ascendant; and is therefore called by the *Greeks*, κακή τύχη; and by the *Latines*, *Mala Fortuna*. It rules in Man the Belly.

Its Consignificators are *Virgo* and *Mercury*; and of Colours, the Black.

Of things belonging to the Seventh House.

THIS House judgeth of Marriage, and all matters of Love; all Quarrels, Law-Suits, Duels. In Astrology and Physick it signifieth the Artist himself: also Thieves, Thefts, whether by Man or Woman; publick Enemies. In Eclipses and Mundane Revolutions, it judgeth of War and Peace, which may happen; and if War, who overcomes: Also of all Fugitives and Runaways.

It is a Masculine Angle, and rules in Man the Reins down to the Hips; and is called by the *Greeks*, Σύνε.

Its Consignificators are *Libra* and the *Moon*; and of Colours, it rules the Black.

The signification of the Eighth House.

FROM this House is required Judgment of Death, and the Estate of dead men; the Portion of the Wife or Sweet-heart. In Duels it shews the Adversaries Second: as also Wills and Legacies. In Mundane Revolutions it gives Judgment of the Enemies Assistants, their Allies, and Confederates. It shews Fear and Sorrow, and is called the House of Sorrow.

It is a Feminine and a Succedant House, called by the Greeks, *Ανταρδιος*.

Its Consignificators are *Scorpio* and *Saturn*; and rules in Man the Privy Part, and of Colours, Green and Black.

Of matters belonging to the Ninth House.

HENCE is Judgment required concerning Bishops, and all Clergy-men in general, Church-livings and Benefices; of Voyages, long Journeys beyond Sea, Dreams, the Kindred of the Wife.

It is a Masculine Cadent House, and called by the Greeks, *Οιός*.

Its Consignificators are *Sagittary* and *Jupiter*; and it rules in Man the Thighs and Hips; and of Colours, Green and White.

Of

Of things signified by the Tenth House.

THIS House takes notice of all Sovereignty, Kingship, and Dignity, with Dukes, Earls, and Judges, Commanders in chief in Armies, and elsewhere; the Profession or Trade that any one useth; as also Honours, and Preferment; the Mother of the Native or Querens; also Kingdoms, Empires, &c.

It is Feminine and Angular, and called by the *Greeks*, *Ματρηγενετιος*; by the *Latines*, *Medium Cæli*, *Cor Cæli*, and *Domus*, and *Cuspis Regalis*.

Its Consignificators are *Capricorn* and *Mars*; and it rules in Man the Knees and Hams; and of Colours, Red and White.

Of things belonging to the Eleventh House.

FROM this House we require Judgment of Friendship, of Friends, their Quality and Condition; the Querent or Natives Hopes: It also signifies the Assistants of Princes, both in Money and Allies; it signifies the Exchequer, the Council, Ammunition, and Soldiers.

Its Consignificators are *Aquarius* and *Sol*. It is a Masculine Succedant House, and is called by the *Greeks*, *Ἀγαθοδαίμων*; and by the *Latines*, *Bonus Genius*; it rules in Man the Legs; and of Colours, the Yellow is attributed to it.

Of things belonging to the Twelfth House.

This is the House of Sorrow, and represents our private Enemies, all great Cattle, Sorrow, Imprisonment, Affliction; and it is called by the *Greeks*, *Kaxodaiuv*; and by the *Latins*, *Malus Genius*.

It is a Feminine Cadent House, whose Consignificators are *Pisces* and *Venus*; it rules in Man the Feet; of Colour, it ruleth the Green.

FINIS.
